Stock Allocation

Stock Allocation Overview

Stock Allocation is where we manage sales orders based on stock availability (shortage vs. sufficient stock).

- Tab "Allocated": Shows sales orders that have sufficient stock.
- Tab "Unallocated": Shows sales orders that have sufficient stock.

Editing Sale Order

To edit a sales order, it must be set to unallocated first. Afterwards, the sales order will appear under Option Order Editing.

Steps to edit a sales order:

1. Navigate to Stock Allocation.
2. Change the sales order status from Allocated → Unallocated.
3. Once completed, proceed to Order Editing.
